

Current Medications Documentation

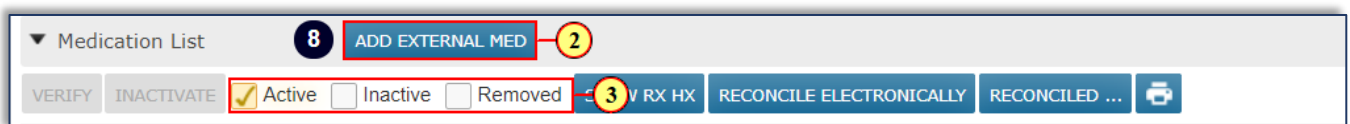

This lesson covers the required documentation for the **MIPS # 130 Current Medications Documentation** quality measure.

1. In addition to Chart Summary tab, the Medication List can be accessed:

- In the **Clinical Profile** tab > **Medications** sub-tab
- In the **Nursing Care** tab by clicking the **Medication List** button

Regardless of the location, the functionality of the Medication List is the same.

2. Clicking **ADD EXTERNAL MED** allows you to document External Medications for the patient.

3. **By default, the Medication List displays only** ☒ **Active** **medications.**

To view **Inactivated** medications, the checkbox ☐ **Inactive** must be selected.

To view **Removed** medications, the ☐ **Removed** checkbox must be selected.

iKnowMedSM Generation 2

| Type/Description | Start | End | Status | Inactivated/Verified Info |
|---|------------|-----|--------|---------------------------|
| <input type="checkbox"/> ACP-196 invest Oral 100 mg capsule 1 capsule orally 2 times per day. Take 1 (one) capsule by mouth twice daily. | 03/22/2011 | -- | Active | |
| <input checked="" type="checkbox"/> Compazine (Prochlorperazine Oral) 10 mg tablet 1 tablet orally every 6 hours as needed for nausea. | 12/17/2021 | -- | Active | |
| <input type="checkbox"/> Oxycodone Oral 10 mg tablet tablet orally every 4 to 6 hours as needed for pain. | 12/17/2011 | -- | Active | |

4. Clicking a checkbox next to a medication selects or deselects it.

5. The checkbox in the section header allows you to select or deselect all Prescriptions and External Medications at once.

6. If a medication needs to be inactivated, click **INACTIVATE** after selecting the medication(s). An **Inactivate Reason** is required.

7. Once selected, click **RECONCILED** to **reconcile the medications and meet the measure requirements**.

8. You may also click **VERIFY**. Clicking **VERIFY** or **RECONCILED**, or **both** will **meet the measure numerator**.

9. Click the box if the patient has **no known external medications**.

10. Click **YES** to confirm.

RECONCILE ELECTRONICALLY

RECONCILED ...

This concludes the lesson for the required documentation for the **MIPS #130 Current Medications Documentation** quality measure.

Note: If a new CCDA document has been received and attached to the patient

chart, the **RECONCILE ELECTRONICALLY** button will turn red. Clicking on it will allow you to electronically reconcile the patient's medications for the *Promoting Interoperability Support Electronic Referral Loops by Receiving and Reconciling Health Information measure only*. Please see the job aid for Promoting Interoperability Support Electronic Referral Loops by Receiving and Reconciling Health Information steps.
