iKnowMed℠ Generation 2

Documenting A Pain Care Plan

In this lesson you will learn the required documentation for the **MIPS #144 Plan of Care for Pain** quality measure. A pain care plan must be entered for every qualifying encounter (E/M visit) if pain has been quantified as >0.

1. To add a **Pain Care Plan**, click **ADD CAREPLAN** under **Care Plan** in the patient's **Clinical Profile**.
2. The **Pain Care Plan** is also accessible directly from the **Patient Banner**, when expanded. If the **Patient Banner** is not already expanded, click the arrow next to the patient's photo to expand it.
3. If the patient's pain is documented at a value greater than 0, the value is red. Click **Pain Scale** to go directly to the patient's **Pain Care Plan**.

4. Alternatively, if you have added it to your **Quick Action Menu**, access the **Pain Care Plan** via the **Running Man**.

Pain Care Plan (Date of service: 04/13/2021)

▼ Date of Service

04/13/2021 07:32 AM   TODAY   ⑤

Pain Scale (0-10): 5 ⑥

▼ Pain Treatment Plan

- ☐ No pain reported
- ☐ Use of Opioids
- ☐ Non-opioid analgesics or techniques
- ☐ Non-pharmacologic interventions (relaxation techniques, use of heat/cold)
- ☐ Driving prohibitions discussed
- ☐ Opioid agreement signed
- ☐ PDMP reviewed
- ☐ Patient and/or family education
- ☐ Patient and/or family education- patient refuses pain management intervention
- ☐ Psychological Support
- ☐ Radiation treatment
- ☐ Reassessment of pain at an appropriate time interval
- ☐ Referral to a pain clinic
- ☐ Referral to other provider
- ☐ Urine drug screen order provided and discussed
- ☐ Other

⑦

5. The **Date of Service** defaults to the current date and time and can be changed by clicking in the field or using the calendar widget.
- To meet the measure, the plan must be documented on the same date as the qualifying encounter where pain intensity was documented as >0.

6. If the **Pain Scale** was documented in the **Vital Signs** area, it is displayed in the **Pain Care Plan**.

> The Pain Scale value also displays in the **Patient Banner** when it is expanded.

7. The checkboxes allow you to select all applicable **Pain Treatment Plan** options.
