

PIMSH 10 Hepatitis B Serology Testing and Prophylactic Treatment

In this lesson you will learn the required documentation for MIPS **#PIMSH 10 Hepatitis B Serology Testing and Prophylactic Treatment Prior to receiving anti-CD20 Targeting Drugs** quality measure.

1. You can see if an **anti-CD20 drug** was given in the **Flowsheet**. The green "G" indicates the drug was given.

2. If the lab results are received via a lab interface, the results can be viewed in the **Flowsheet**.

- See the attached list of included Hepatitis B lab tests.
- **Note:** if a custom lab order has been created and used, it may not be recognized by the coding of the specific labs needed, even if it included Hepatitis B testing.
- You may manually enter the labs if needed:

NOTE : Another way to update the Hepatitis B test results, is in the diagnosis on the Problem list.

9. Go to the **Problems** tab and click on the **diagnosis**.
10. In the details section, scroll down to the **Hepatitis B Testing Status**.
11. Enter the **results**.
12. Click **SAVE & CLOSE**.

NOTE on diagnosis documentation: While not always required for every MIPS measure, it is always best clinical practice to document all staging, testing, and TNM information as fully as possible. *Practices in the Enhancing Oncology Model (EOM) will find this complete, consistent documentation extremely helpful in Clinical Data Element Reporting.*

iKnowMedSM Generation 2

13. If the patient declines the screening, you may Document this by checking the radio button next to **"Declined by patient"**.

Problem	Diagnosed	Modified	Status
Colon cancer (principal diagnosis) Audit Stage IVA (Primary, Transverse colon, T1, N1a, cM1a)-Pathological; Hepatitis B Testing Status: Result: Negative	04/27/2021	05/21/2021	Active

14. The results will now be included in the diagnosis details.

If the patient already has a Hepatitis B diagnosis, this must be added to the problem list for the patient to be excluded from the measure.

18. Go to the problem list.
19. Click **ADD PROBLEM**.

iKnowMedSM Generation 2

The screenshot shows the iKnowMed Generation 2 interface for entering a problem. The 'Problems' tab is selected. The 'Hepatitis B' problem is being entered. The 'Problem (required)' field is highlighted with a red box and a yellow circle labeled '20'. The 'Date of Diagnosis' field is highlighted with a red box and a yellow circle labeled '21'. The 'Status' field is highlighted with a red box and a yellow circle labeled '22'. The 'SAVE & CLOSE' button is highlighted with a red box.

18. Search for **Hepatitis B** and select.
19. Add **date of diagnosis** and add details.
20. Click **SAVE & CLOSE**

This concludes the lesson for MIPS #PIMSH 10 Hepatitis B Serology Testing and Prophylactic Treatment Prior to receiving anti-CD20 Targeting Drugs quality measure.
