iKnowMed Generation 2 –Tips for Using the Supportive Care Interventions Tab in iKM

- No fields are "required", so use what is applicable to you and your role and the interaction with/for the patient
- If the encounter is something you would document in an iKM note, it is encouraged that an entry in the Supportive Care Interventions tab be created
- User should still document a text note in their note template as the information from the Supportive Care Interventions will not be included in text note templates
- Document all activities/interventions done with or for a patient
- Use "edit" if making a change on the same day
- Create a new entry if the intervention occurs on a different day
- It is encouraged that the team(s) meet as a group to review and discuss the fields available in the Supportive Care Interventions tab so all users are utilizing the tool and responses consistently
